TIMOTHY DAVIES

Global Director – Agentic Experience · Salesforce

Experience strategy for the agentic era: how organisations, their customers and AI agents work together, designed for everyone.

London, UK · timothydaviesxd@gmail.com · linkedin.com/in/tdxd

For fifteen years I have made the same argument: enterprise technology is built the wrong way round. Organisations buy technology, chase business value, and treat experience as the final coat of paint. **I flip it. Define the experience first, use technology to close the gaps, and the value follows.**

Over a decade at director level, I have built design practices from nothing, led experience across PwC's Salesforce portfolio from its EMEA leadership team, and now shape how Salesforce and its most strategic customers design for the agentic era. I combine organisational leadership, executive influence and the hands-on AI fluency to prototype the answer myself.

8 weeks	**5**	**2**	**15 years**
from SOW sign-off to a live public agent on F1.com, for 827M fans	design practices and teams I built or led, at C-suite and partner level	live Salesforce design certifications I co-wrote	leading experience on Salesforce, through every era of the platform

LEADERSHIP RECORD

- **Building organisations.** Built or led five design practices and teams: my own studio, founded at nineteen; practices of ten (Tquila) and sixteen across two countries (CloudSense); PolSource's UI/UX practice, built from zero and reporting to the C-suite; and a UX community of around 30 across every vertical and region at PwC, with a seat on its EMEA Central Leadership Team.
- **Executive and product influence.** Co-developing an agentic portfolio and concept strategy with Salesforce product leadership for executive review. Concept prototypes for executives built in days, including an agent that learns how a seller works and a voice-first Agentforce experience for mobile and in-car. Experience reviews across Slack, Tableau and the core platform.
- **Standards for the ecosystem.** Co-wrote the Salesforce Certified Platform User Experience Designer (2021) and Platform Strategy Designer (2022) exams, both still live. Wrote and presented Salesforce's company-wide enablement on accessible agentic design (2026).
- **Agentic delivery at the highest profile.** Formula 1: conversation design for the Agentforce fan companion on F1.com, serving 827M fans, live 8 weeks from SOW sign-off. Coca-Cola Europacific Partners: voice and multimodal experience lead for a field sales agent across CarPlay, AirPods and in-app chat.

EXPERIENCE

Global Director – Agentic Experience · Salesforce, London — Jan 2026 – Present

Global remit. Drafted in to lead experience on Salesforce's most strategic Agentforce programmes.

- **Strategy with customer executives.** Shape with customer leaders where AI creates value, what to build first, how it earns trust and how people adopt it, then build the working prototype myself in Claude, Cursor and Figma so leaders decide on something real.
- **Client impact.** Delivered across nine industries this year: a full agent design system for Southwest Airlines, a guided-purchase journey for Sonos later reused on Southwest, conversation design for athenahealth, a voice proof of concept for Pfizer, and a concept for Ocado Retail chosen by Salesforce leadership to show the client what is possible.
- **Methods and people.** Created three reusable interaction patterns from live delivery (explainable AI suggestions, non-punitive scoring, in-chat structured data entry) and a conversation design workshop framework now used across the team. Mentor and peer reviewer to experience specialists.

Transformation Director, UX & AI · Salesforce, London — Jan 2022 – Dec 2025

Global remit. Joined Salesforce at director level; experience lead on transformation programmes and a design voice inside Salesforce's own products.

- **Client leadership.** Set experience strategy with client executives so implementations were adopted, not just delivered, including presenting to a global airline's executive team at its headquarters.
- **Leading the move to agentic.** Moved into agentic design early in 2025, as Agentforce reached customers: conversation design, agent persona and brand voice, voice UX, custom agent interfaces and heuristic audits.
- **Thought leadership.** Hosted a global executive session at Salesforce Tower London for a multinational automotive client's senior leadership, and gave a series of talks across its territories. Interviewed by Salesforce's VP of UI/UX on experience design in agentic systems.

Salesforce Experience Lead, EMEA → Global · PwC, London — Jan 2019 – Dec 2021

Regional lead, then global. Reported to partner level; seat on the EMEA Central Leadership Team as champion for experience and accessibility.

- Led a UX community of around 30 designers across every vertical, territory and region, within a Salesforce practice of around 3,600 people.
- Led experience on PwC's largest Salesforce programmes, working directly with client executives and delivery leaders. Wrote the practice's Salesforce Adoption and Experience playbook and set its UX and W3C accessibility standards.
- **Jaguar Land Rover:** experience lead on the global retailer compliance platform, across 2,000 retailers in fourteen languages and fully offline-capable. Won PwC's internal CEO Innovation Award. Two programmes I led were MCA Awards 2021 finalists.

Director, Experience Design & Mobile · PolSource, London — Aug 2017 – Dec 2018

Built the UI/UX practice from zero, reporting to the C-suite.

- Built a global team of sixteen deployed by client location: eight front-end designers, two mobile UX specialists and a six-person development team.
- **Volvo Group:** redefined how Volvo Trucks are built, configured and sold on Salesforce, with CPQ at the core, including a working prototype that configures a truck and prices it through the quotation process. Won a Conga Innovation Award.
- Built a partnership with the Salesforce Innovation Center for customer innovation sessions, including an off-site session with Volvo, and led some of the first AR and VR applications built on Salesforce.

Director of User Experience · CloudSense, London — Oct 2013 – Aug 2017

UX and accessibility lead across the company's global engagements.

- Led a distributed team of sixteen across the UK and Croatia, and set UX and W3C accessibility standards across global engagements.
- **British Gas:** delivered an early, large-scale offline iPad field solution on Salesforce, used by more than 10,000 engineers.

Practice Director, UI/UX · Tquila, London — 2011 – Oct 2013

Practice leadership: ten people across design and mobile.

- Partnered with Salesforce sales leadership to pitch experience-led solutions. The custom interface work was showcased internally by Salesforce, at a time when the platform offered little beyond its standard UI. Tquila was later acquired by Accenture.

Momac, Imano and own studio · London — 2006 – 2011

Founder, then senior designer.

- Native iOS and Android apps for UEFA, Harrods and Ray-Ban.

RECOGNITION AND SPEAKING

Outstanding Contribution to the Salesforce Ecosystem award · MCA Awards 2021 finalist (two programmes) · NHS Heroes CEO Award · Speaker, IBM AI for Change, Helsinki

CAPABILITIES

Design leadership and organisation building · Experience strategy · Agentic journey design · Conversation and voice design · Multimodal and in-car experiences · Accessibility and inclusive design · AI prototyping · Executive workshops and facilitation

EDUCATION

BA (Hons) Digital Media, User Interface Design & HCI, Canterbury Christ Church University, 2007–2010
